Steam Spray Spotting Gun-c1138

THIS IS THE NMP (OR NO MOVING PARTS) SPRAY SPOTTING GUN. IT'S DESIGNED FOR LIGHTNESS AND MAXIMUM SYPHONING ACTION.

TO OPERATE, THE LARGE TUBE IS CONNECTED TO A STEAM LINE WITH FOOT CONTROL SUCH AS THE REGULAR SPOTTING GUN LINE ON A SPOTTING BOARD...THE CLEAR VINYL HOSE IS CONNECTED TO THE SMALL TUBE AND THE OTHER END IS PLACED IN A GALLON CONTAINER OF SPRAY SPOTTING SOLUTION, LOCATED ON THE FLOOR. WHILE STEAM OR AIR IS GOING THRU THE STEAM LINE, PLACE THUMB OVER THE THUMB HOLE. THIS CAUSES A SYPHONING ACTION, DRAWING THE SPRAY SPOTTING SOLUTION UP THE VINYL TUBE TO MIX WITH THE STEAM OR AIR DIRECTED ON THE STAIN... DO NOT PLACE NOZZLE TOO CLOSE TO THE GARMENT AS THIS CAUSES BACK PRESSURE AND DIVERTS SOME OF THE FLOW BACK THRU THE THUMB HOLE.

THE NMP IS SIMPLE TO CLEAN SHOULD IT BECOME CLOGGED...THE JET TIP, NOZZLE AND THUMB HOLE EXTENSION ALL UNSCREW FOR CLEANING. RUN A FINE WIRE THRU ALL COMPONENTS FOR CLEANING.

SHOULD STEAM VENT OUT OF THUMB HOLE WITH NORMAL HOOK UP, SIMPLY REDUCE STEAM PRESSURE AT FOOT VALVE ASSEMBLY.
